Physiology with pathophysiology elements – how to complete the course?

Course and credits
The course is consisted of lectures, seminars and exercises. We expect you are prepared of the topic before the seminars and exercises – your knowledge can be examined during the classes..

After block of coherent topics summarizing credit must be taken (usually MCQ test). The questions will cover all the topics from block (excluding lectures). You should be prepared as best as it is possible - seminars and textbook is enough. There are planned 5 credits during a year – 3 physiology credits and 2 pathophysiology

Negative mark from any credit requires to take the credit again. Deadline for retakes is a week before the end of the year.

Textbook
Gary D. Hammer, MD, PhD, Stephen J. McPhee, MD, Pathophysiology of Disease: An Introduction to Clinical Medicine, 2014, 7e, McGraw Hill.

Final exam
Will be held during the summer session. The question will cover topic presented during classes and material given in the textbook. It will be an MCQ test.

To attempt the exam you need: 1. to have required no of attendance (see below) 2. positive marks from all credits;

Having passed the exam you have completed the course of pathophysiology

Absences.
You can leave one day per semester with no excuse. If you leave next days it is required to contact with the teacher and establish the way how to make up it.
If you have more then one absence which is not made up, even if you pass the credits you are not allowed to attempt the final exam.
If you are absent at 50% of the whole course regardless if they are made up or not there is no possibility to finish the course and attempt the exam. (In fact it could means you made the studies extramural)

Problems
Any problems regarding the course please contact
Grzegorz Szewczyk MD, PhD: email: grzegorz.szewczyk@wum.edu.pl

Any formal applications should be adressed to the Chief of the Department: prof. Dariusz Szukiewicz, MD, PhD directly through the secretariat.
